EBSB team

ABOUT ME

Looking for an opportunity to enhance my knowledge about the new and emerging trends in corporate sector and wanting my efforts to make a considerable difference in the company and help in their consequent success.

PROJECTS

- **A Craigslist Clone WebApp**
A web scrapper webapp using Beautiful Soup library of python and Django framework.
Used requests and Beautiful Soup for scraping and parsing data from the HTML elements of the Web
 - **TravelNow Website**
A web based application made with HTML, CSS and JavaScript to provide users a convenient way to book packages and lookout for famous destinations around the world.
Includes MySQL database for backend to store the details of the user and provide the required response made by the client.
 - **IRCTC Booking Application**
A project made with Java that helps users to find any trains that they are looking for.
Provides services like booking tickets, look up for trains to a specific destination and also check upon the latest updates.
Used concepts of OOPS like Inheritance and Abstraction, Exception handling, Packages and Abstract Widget Toolkit(AWT) for GUI.
 - **Technical Paper Writing –Nutritional Diet Recommendation System**
Published paper in Alochanachakra Journal Classification in Data Mining and Random Forest Algorithm
Aimed at designing an application that can recommend a healthy diet plan
<http://www.alochanachakra.in/gallery/249-acj-may1623.pdf>
